

# Eddy current sensor WSD S2/10

SENSOREN

## Application

The eddy current sensor WSD-S2/10 has a strictly linear measuring range and can therefore be used for all different kinds of sensing tasks, e.g. for highly precise distance measurement against steel, at high measurement speeds. This also includes double-sheet monitoring on punching tools. The electronic is in the sensor integrated. The analog output signal is from 0 to 10V DC.

## Features

- high measurement precision
- integrated electronic
- high measurement speed
- contactless measuring
- Analog output (0...10V)
- pluggable
- simply installation
